Report Good Seed Supply for 1936

EDMONTON, Oct. 25 (Spec.)—Mrs. John Peterson, who has
just returned from a visit to
her daughter's home in Arm-
strong, B. C., has not contrib-
uted much toward the up-
keep of the railway companies.
Plans for marketing approx-
imately 600,000 bushels of cer-
tified and registered seed grain
were discussed when the execu-
tive of the Alberta Seed Growers
Association met at the L. Glas-
sco Buildings yesterday.

Dealing with the question of
sales policy, the members discus-
sed what premium should be est-
ablished on prevailing grain
prices, but no announcement was
made.

It was estimated that there will
be 200,000 bushels of registered
and 90,000 bushels of certified
wheat for disposal to farmers. In
addition to 225,000 bushels of
registered, and 75,000 bushels of
certified oats.

Attending the meeting were H.
P. Wright, of Airdrie, president
of the association; H. R. Hutton,
Coaldale; R. Smith, Branson; A.
Mueller, Moring; A. Badley,
Lacombe; E. H. Buckingham,
the department of agriculture, sec-
retary; F. Foulds, Calgary, Dom-
inion government district inspec-
tor.

Today, a meeting of the Prov-
incial Seed Board opened, with C.
S. Longman, field crops commis-
sioner, presiding. Adoption of a
co-operative seed exchange plan
between provincial and federal
governments, and plans for the
seed fairs this winter were on the
agenda.

Also attending the meeting were
J. C. Clabine, Wembley, and D.
W. H. Fairclough, of the Alberta
Experimental Station.

Chinook W. I. Held Meeting

The monthly meeting of the
W. I. was held at the home of
Mrs. Wilson Wednesday after-
noon. The plans were made
for the Tea and Bazaar which
is to be held Saturday, Nov. 6.
Mrs. Thompson who was in
charge of the program was
unable to be present, however,
there was a profitable talk on
"Don't Worry" by one of the
members.
A dainty lunch was served
at the close by the hostess.

MODERN LUXURY FOR "HEAD-END" PASSENGERS

MEMBERS of the Board of Directors and officers of the Canadian National Railways are seen in the above photograph, sampling the comfort of the first of fifty new air-conditioned coaches soon to go in service on regular trains. At the front on the left side of the aisle is R. C. Vaughan, Vice-President in charge of Purchases, Stores and Steamships. Behind him sit W. A. Kingsland, Toronto, Vice-President, Central Region, R. J. Moffat, Bradwell, Sask., Director, and F. L. C. Bond, Toronto, General Manager, Central Region. On the right, according to rows, are Wilfrid Gagnon, Director, Montreal; John Roberts, Chief of Motive Power and Car Equipment; C. V. Johnston, General Passenger Traffic Manager; and Arthur D. Neale, Vice-President, Canadian Car and Foundry Company Limited, builders of the new coaches. Extending the latest improvements in modern railway practice to the "head-end" of the train, the fifty coaches are equipped with air-conditioning, and the 64 seats with reclining upholstery, are on swivel and adjustable to three positions. Aluminum parcel racks and individual shade-curtains and guardless lights give the cars a smart interior appearance and add to the sense of luxury.

When a cold strikes . . .
don't take needless risks

Treat Colds This PROVED Way

WHY experiment? Vicks VapoRub has been doubly proved for you . . . proved by everyday use in more homes than any other medication of its kind; further proved by the largest clinical tests ever made on colds. (See full details in each VapoRub package.) Only Vicks VapoRub gives you such proof.

VapoRub is the direct external treatment. No "dosing"—no risk of stomach upset. Simply massage it on the throat, chest, and back (as illustrated). Relief starts almost at once. You begin to feel warm and comfort.

able as VapoRub starts working direct through the skin like free aloe. At the same time, its medicated vapors—released by the warmth of the body—are carried direct to the irritated air-passages with every breath. This double action loosens phlegm—helps break local congestion. Repeat treatment at bedtime. After restful sleep comes, VapoRub keeps right on working, hour after hour. Often, by morning the cold is over.

Now WHITE-STAINLESS

Freedom With Tolerance

Those much cherished and dearly bought attributes of democracy, freedom of thought and freedom of speech, will never be imperilled as long as they are accompanied by sincere and earnest efforts to practise the responsibilities and reasonable restraint which the enjoyment of these privileges entails.

The duty of preserving these rights which the people of this country enjoy in such large measure devolves not only upon the individual but upon all who have the direction of the channels employed to give expression to human thought and utterance—the pulpit, the press, the school, the theatre, radio, the meeting place and even the home.

As long as these media of expression have full cognizance of their responsibility for the maintenance of free thought and free speech and exercise that responsibility in a proper spirit of tolerance and restraint, the privilege of free thought and free speech will remain a right to be enjoyed. If not, the danger arises that these rights will become a privilege only and the privilege of the few.

Undoubtedly Sir Edward Beatty had something of the kind in mind recently when, addressing convocation at McGill University, he appealed for freedom of thought and freedom of speech "but within the limits of accurate knowledge, sound logic, a sense of responsibility and the ordinary amenities of public life in a civilized community."

While Sir Edward Beatty, in the time, was applying the general principles he was enunciating to the universities as leaders of thought in the communities they serve, the admonition he was conveying has a much broader application, for while these institutions of learning, exert a strong influence on present and future trends of thought and utterance, so also have these other agencies to which reference has already been made.

In fact, it might perhaps be urged, with little fear of contradiction, that some of them and particularly the radio and the press, exert a much greater influence on the conduct of citizens of the present day and the future and, hence, the type of government that will guide the destinies of the country, than do the universities.

The reason for such a statement is not far to seek, for the newspapers and the radio are presenting viewpoints day in and day out the year round to a vast audience of all ages and of all classes, whereas direct contact of the universities is limited to youth for brief periods of three or four or five years and within this period for only a portion of the year, and their direct influence is further confined to a class of youth whose parents can afford the fees of a college education or who are sufficiently ambitious to find the wherewithal for the expense from their own efforts.

Hence, if the responsibility imposed on the universities to safeguard democratic rights, including free thought and free speech is great; how much greater is the responsibility of the radio and the press.

To date little or no ground complaint has been heard that radio has not lived up to its obligations in this respect and it is to be hoped and expected that the recently-organized Canadian Broadcasting Commission will keep this objective in mind, that is that while free expression of opinion broadcast in the form of speeches through the ether is highly desirable, so also is the use of restraint and the exercise of a spirit of toleration, whether the topic be political, religious, social or economic.

The same holds true, including that of respect for the opinions of minorities, rests squarely on the shoulders of the press of the country, both daily and weekly, and as long as these organs of opinion fulfil this trust there is little likelihood of the people of this country acquiescing in attempts to muzzle the newspapers or dictate their policies.

It has often been said that a free press is the bulwark of democracy and so it is. It will continue to occupy the proud post of defender of the democratic faith as long as it continues to exercise moderation, tolerance and respect for the rights of others.

Almost without exception the weekly newspapers of Western Canada have a fine record in this respect and that is the reason they exert a profound influence in the communities which they serve. There is no reason to suppose that in the future they will not continue to carry the torch of democratic freedom and perpetuate the fine example they are giving to the press in countries which are not so fortunate as the Canadian west.

From time to time highly deserved tributes have been paid by those in authority and others, to the independent but tolerant spirit reflected in the columns of the weekly newspapers of the prairie provinces. In doing their duty in assisting to uphold the fundamentals of democracy the weekly newspapers have set a high standard and are doing much to foster and maintain a high standard of citizenship and to fortify their own position in the hearts and minds of the people.

Toughest Carpets Ever Made

Glasgow Is Supplying Two For London Picture House

Glasgow is to supply London with two of the toughest carpets ever made. They will be received next week by a super-cinema man Piccadilly. Both carpets are rosepink, with deep purple patterns, and have been woven about 38 to 40 feet square to stretch from vestibule to lounge.

One carpet will be laid over the other so that some of the labor of changing may be avoided. Another reason for this is that while the top carpet is away being repaired the second can act as understudy. All this is necessary, because patrons of screen art tread cigarette-ends into the floor coverings at the rate of 20 a day and a percentage of these slugs burn deep holes.

The most difficult thing for a young mother to learn is that other people have perfect children, too.

The longest railway run in the world is from Pigeon, Vladivostok, a distance of 6,800 miles.

Books published in Germany in the last year include 19,000 new editions.

Did Not Enjoy Ride

Man Who "Rode Rods" On Trailer Had Complaint

F. Logan Thomasson, of Hollywood, announced he had found probably the first hobo to "ride the rods" of a trailer. When the Thomasson super-trailer struck a hole at the city limits, the driver got out to check for damage and a begrimed man crawled off a board on the dual axle. The man said he had held on all the way from Cincinnati, and was rather uncomplimentary about the mountain roads and the speed of Mr. Thomasson's six-cylinder automobile.

Would Take Long Time

Tourists who are anxious to cover a lot of territory in a few days will be interested in knowing that a motorist driving 45 miles an hour regularly for 10 hours a day would require 13 years, 10 months and 21 days to travel over all the improved roads of the United States. So it can't be done on one vacation, after all.

The trend to window boxes on trailers will in time evolve a back-seat type that says, "John, I believe the petunias would do better in Tennessee."

2227

New Material For Shoes

Australia Is Going To Use Skin Of Reef Eels

A unique industry is now being started along the Great Barrier Reef, Queensland, Australia, the 200-mile buttress of this island continent against the bluster of the Pacific Ocean. This is fishing for the reef eels. Abounding there, they will be sought solely for their hides, which will be used to help out the wardrobes of women. Extensive researches by the Australian government have proved that skins of reef eels can be made into a soft and extremely durable leather, and factories are being established to manufacture them into women's shoes.

The reef eel is the fiercest fighter of the Pacific. The shark is no match for it, and a diver would not hesitatingly choose to fight the shark instead of the eel if he were forced to do so.

It takes a killer whale's bulk to subdue the reef eel, which, known to science as *Rhabdura macrura*, inhabits the waters about the Great Barrier Reef and is found only in tropical and subtropical latitudes.

The largest eel yet caught measured almost thirteen feet and is preserved in the Brisbane Museum. Fearless, alert, swift, remarkably pugnacious, this "debtless sea snake" of the natives may well have been the original of some of the more fearsome tales of sea serpent legends. Its greater swiftness is the undoing of its enemies, and it is amazingly equipped with teeth, which stud the roof of its mouth as well as its jaws.

Still In Its Infancy

Television Pictures Seen In New York Were Blurred

Television pictures broadcast from the National Broadcasting Company's transmitter atop the Empire State Building were flashed across fifteen city streets on a screen on a 3-by-4-foot screen to entertain members of the Society of Motion Picture Engineers assembled at Radio City.

For the first time in New York home-movie-size "teletypes" were publicly demonstrated on the enlarged screen. They were made possible by a projection tube developed by D. R. Law of the R. C. A. Manufacturing Company. Up to now the 7-by-10-inch radio image has been the general standard.

The large picture was viewed in a dark room. The image was foggy and its associated sound indistinct compared with a 7-by-10-inch talking picture, also demonstrated.

Veteran motion picture engineers commented as they watched a pianist perform on the large screen, that "television is still in its infancy." They say the need for much simplification of the apparatus, which at the current state of development is too cumbersome for the parlor, looking more like an electric furnace than a radio receiving set.

Condemned as dangerous, the famous "King's Oak" in Tilford, England, has been reprieved. The great tree, said to be mentioned in Domesday Book, will be made safe by experts.

Civilized man has now progressed so far he has little to fear except disease germs and civilized man.

It has been estimated that American surgeons perform 1,000,000 operations a year.

There's always a tie between father and son but the son usually wears it.

HE WAS ALWAYS TIRED AND ILL

Three Complaints Gave Him a Miserable Life

Suffering from three complaints—disordered kidneys, sciatica, and rheumatism, how could this man be anything else but always tired and ill? This is what he writes:

Up to a month or so ago, I had suffered continually from kidney disorder, sciatica, rheumatism, and generally felt off colour. I was constantly tired, and under medical supervision. I tried many remedies, but without effect until I gave Kruschen Salts a trial. In four weeks Kruschen has brought about a complete transformation. I have a healthy appetite and once more feel that it is good to be alive."

The kidneys are the filters of the human machine. If they become sluggish, impurities find their way into the blood-stream, and the seed of half-a-dozen common ailments is sown. The scientific combination of salts in Kruschen quickly coaxes the kidneys back to healthy, normal action. Soon your ailments are relieved and life becomes a joy again.

For Emergency Use

Every Home In Britain To Have Six Months' Food Supply

Every home in Britain is to have six months' food supply, consisting of six months' "iron rations" for emergency use in the event of another war. Householders are to be given the option of purchasing specially-prepared parcels of imperishable foodstuffs at prices ranging from £5 to £100, according to quantity.

It will be possible to add to the cheaper parcels until the war dump is sufficient to feed a family of five or more for a maximum of six months.

For those unable to afford cash, hire purchases terms will be arranged by the finance houses. It is estimated that within two years 5,000,000 families will have food reserves tucked away at home.

An average of £30, according to the experts of the Empire Movement, which is sponsoring the scheme, will be spent by each of the 5,000,000 families. This will pour into English and Empire trade the colossal sum of £150,000,000—all "new" money—which should result in a tremendous fillip for certain industries.

The Empire Movement, probably the most powerful patriotic body in the Empire, has very substantial backing in both Houses of Parliament, and has a country-wide organization capable of taking the food dump plan into every town and village.

Canada's Position

Should Co-operate With Great Britain And The Empire

Where do we go from here? Some would have us play "Mary Mary, Quite Contrary" and make faces at Mother Britannia merely to show that Canada is a grown-up, independent girl. Others, with more realism, see that good sense no less than sentiment requires that we co-operate with Great Britain and the Commonwealth.

And the overwhelming majority of Canadian, French-speaking or English-speaking, desire that co-operation within the free institutions of the Empire. Of course, Canada comes first, but loyalty to Canada does not require that the Empire should always come a bad last. The sane policy for Canada is one of free co-operation with Britain—not just kicking—Winnipeg Tribune.

Is Automatically Set

Cheese Spray Entices Mice To Most Modern Trap

The modern mouse must be getting to be a pretty sharp fellow—at least, judging by the tricky gadgets being invented these days to catch them.

One of the latest is described by Roy C. Burton, managing director of the National Inventors' congress.

"It is irresistible to the first mouse and when he enters he automatically sets it for the second mouse," explained Mr. Burton. "The first seizes in front of him a modernized mouse hole, sprayed with cheese perfume, thin and elusive at the entrance and stronger toward the end of the hole. He enters a hallway and looks into a lighted mirror, and he thinks his reflection is another mouse. Losing all caution, he moves into a glass-enclosed compartment full of mirrors, but he discovers the cheese is in another transparent chamber, and he stops to cogitate. Another mouse outside looks in and sees a dozen mice—a whole convention—so he comes in, too. Another grate drops, and so it goes."

ALICE STEVENS' RECIPES

TOUGH CUTS OF MEAT CAN BE MADE TENDER

Tough cuts of meat are avoided by many people because they find the meat is not satisfactory. It lacks flavor and is hard to chew. This is because the meat is not properly cooked.

As a matter of fact the tough cuts of meat have a finer flavor than tender cuts in many cases and there is certainly a great difference in cost. Excellent give meat its characteristic flavor and there is a greater quantity of extractives in the tough cuts than in the tender cuts. The quality of connective tissue in the animal determines the toughness of the cuts. Age and exercise back to healthy, normal action. Soon your ailments are relieved and life becomes a joy again.

Cooking tough cuts to make them tender is simply a matter of softening this connective tissue. There are four rules given for this.

1. Cook the meat slowly for a long time. Pot roasts require from 30 to 40 minutes to the pound, while oven roasts require 20 minutes to the pound. Tough cuts are used for the pot roasts and the additional time helps to soften the connective tissue. Cook in a tightly covered pot so that the steam can help with the cooking. This helps to break up the connective tissue. Meat for hamburger is put through a meat grinder.

2. Pound the meat. This lessens the connective tissue. Sprinkle the meat with a little flour before pounding. The flour helps to break up the juices and helps retain the flavor.

3. Cook the meat with an acid. This helps to break up the connective tissue and softens it. For this reason, tomatoes are often cooked with tough cuts of meat.

4. Try this recipe for apple rings. It makes an attractive garnish and adds to the tastiness of a meat dish.

APPLE RINGS

Wash and core apples but do not peel. Cut in half inch slices. Heat frying pan and add fat such as lard, butter or drippings from a roast of beef or pork. Fry the apple rings in this fat. Sprinkle with salt and sugar. Turn and brown on both sides. Attempt frying only one layer of rings at a time. Serve with roast pork or sausage.

Readers are invited to write to Alice Stevens, Home Service for free advice on home cooking and household problems. Address letter to Alice Stevens, Newspaper Syndicate, 175 McDermott Ave. E., Winnipeg, Man.

For Peaceful Ventures

Practically Every War Instrument Could Be Put To Better Use

Apparently Sir Hubert Wilkins, during his recent search for the lost Russian flyers, was preoccupied part of the time with other thoughts than those of rescue. He has developed his scheme for an undersea carrying trade, conducted by submarine, over the roof of the world.

How practicable his scheme is we would not presume to say, but one thought struck us in this regard. If Sir Hubert's plan ever materializes, it will be the first time the submarine has ever been used extensively in any peaceful venture. The submarine is a sinister craft, at the present time, essentially an instrument of death. It may yet come to serve the needs of humanity, instead of threatening to wreck civilization.

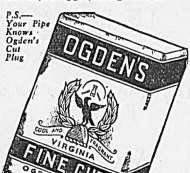

There is a moral here, which humanity, deplorably, will not heed—that almost every ingredient of destruction has a civilized utility, and that the stupidity of man alone stands in the way of its peaceful employment.—Hamilton Spectator.

A Paris telephone exchange has an automatic machine that gives out the exact time, correct to the smallest fraction of a second, in clear, human tones.

THE ROLL OF A NATION

Ogden's Fine Cut has the taste that appeals to Canada's roll-your-owners from coast to coast—the elegant flavor that makes each puff a pleasurable pleasure. With a package of Ogden's—and "Charleston" or "Vogue" papers—you'll quickly see why this mild, cool line cut the "roll" of the nation. 15c now buys a bigger package of Ogden's.

Makes Him Feel Better

Wisconsin Man Starts His Twenty-Seventh Winter In Bed

Arthur E. ("Turkey") Gehrkke, the hibernating barkeeper of Watertown, Wisconsin, has bedded down for the winter. Beginning his 27th winter retreat, Gehrkke locked himself in his bedroom on the second floor of his tavern and denied himself visitors. Even tapping on a water pipe from the main floor failed to bring a response.

Gehrkke's bartenders said he was out of circulation until spring. Meals will be sent up by dumbwaiter.

Gehrkke began retreating for the winter when he was stricken with a stomach ailment many years ago. He found that by staying in bed he felt better, and ever since then has passed the cold months in a horizontal position.

Passing Away Time

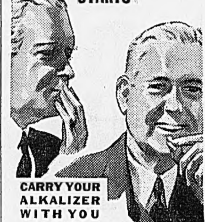

Reciting Poetry Is Fine Way States Irish Dramatist

Every school child should be made to learn at least 100 poems by heart as some protection against the tedium of life in later years, said Padraic Colum, Irish poet and dramatist. "No finer way of passing an hour of enforced idleness can be found than by reciting to one's self some of the great classics," he said in an address. "The time used in pacing a railroad station platform while waiting for a train can be made to seem as nothing in this manner."

There are 47,437 miles of classified roads in Great Britain.

A MISTAKE TO WAIT

WHEN "ACID INDIGESTION" STARTS

CARRY YOUR ALKALIZANT WITH YOU ALWAYS

The fastest way to "alkalize" is to carry your alkalinizer with you. That's what thousands do now that genuine Phillips comes in tiny, peppermint flavored tablets—in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets—equal in "alkalizing" effect to 2 teaspoonsful of liquid Phillips' from the bottle. At once you feel "gas," nausea, "over-curdling" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress—avoid offense to others.

IT'S GREAT TO BE BACK AT WORK

when you've found a way to ease the pains of **RHEUMATISM** and do it the inexpensive way, too.

You can pay as high as you want for remedies claimed to relieve the pain of Rheumatism, Neuritis, Sciatica, etc. But the medicine many doctors generally approve—the one used by thousands of families daily—is "Aspirin".

Simply take 2 "Aspirin" tablets with a half glass of water. Repeat, if necessary, according to directions. Usually this will ease such pain in a remarkably short time.

For quick relief from such pain which exhausts you and keeps you awake at night—ask for "Aspirin".

• "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Asbestos Suits For Pilots

Would Be Protection In Case Airplane Caught Fire

British air pilots are to fly in fireproof clothes—suits of asbestos in which a man could sit in a gasoline blaze without serious injury.

Ground fire-fighting trials with heavy asbestos suits have produced the new flying type, said to be lighter than the lined flying suits now worn by R.A.F. men. The material is closely woven light asbestos cloth.

Tests have shown that a pilot wearing such a suit has time after catching fire in the air to land his aeroplane and escape. In an ordinary fabric flying suit a pilot cannot stand the heat of a real blaze in his aeroplane for more than a few seconds.

An injured man in a fireproof suit could live some time in a crashed blazing aeroplane until rescuers pulled him clear. The suit consists of an overall "teddy bear" suit, helmet, gloves and emergency vision.

The prehistoric sea lizard known as ichthyosaurus, had the largest eyes of all the creatures that ever lived. They were as large as a man's head.

More new automobiles are seen in Turkey than a year ago.

Cut Down Food Wastage

--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses: At grocers, druggists, stationers.

WHAT HO!

—By—
RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER I.—Continued

Lewis extended a limp hand and murmured "Howjerdo?" He had seen cinema artists.

"It is an honor to welcome you to Bear Falls, your grace," said Ernest, shaking the hand.

"Much obliged," said the duke. "The dook," explained Cooke, "is here on a secret mission. Know what I mean?"

Ernest nodded.

"The dook," went on Cooke "is here to see about having the royal collection of wild animals stuffed. He heard about the good work you do, Ernest, and he thinks maybe you're the man for the job."

"That's very flattering," said Ernest.

Cooke turned to Lewis.

"How many animals will you want stuffed, dook?" he inquired.

"Several gross," answered Lewis.

"How many elephants?"

"Tigers."

"Four," said Lewis. "And a half dozen lions."

"Bears?"

"A pair of bears," said Lewis.

"How are you on bears, Mr. Bingley?"

"Fair," said Ernest.

"Splendid, old chap, splendid," said Lewis.

"Now, Ernest," said Cooke, "suppose you go home and figure out an estimate for stuffing and mounting three elephants, four tigers, a half dozen lions, and a pair of bears. Then send in your bid. Is that okay by you, dook?"

"Absolutely okay-doke," said the duke. "Just send the bid to me, care of the king, London."

"Hey, Sam," called the desk clerk, "your wife wants you on the phone."

"Why are wives?" grumbled Cooke, and waddled to the phone booth. Ernest watched his bulk ooze into it.

"Poor old fellow," said Ernest. "The only fun he has is making fun of other people."

"Ruh?" said Lewis, sharply.

"Oh, I don't mind his little jokes," said Ernest. "This one will make him happy for days. Please don't let him know I know. Good-day, sir."

Ernest went on his way.

Presently Cooke returned from the telephone, his portly frame shaking with chuckles.

"Some boob," he said.

"Yeah," said Lewis. "Some boob."

"That evening Ernest Bingley did not pay his almost nightly visit to the public library to seek escape in its books, for choice, the Waverley novels of that other romanticist, Sir Walter Scott. He felt elbowed by an unfriendly world, and sought the seclusion of his studio.

For supper he fashioned himself a shrimp omelette on a gas ring in his bath room, and having consumed it, a jar of cheese, a can of apricots and a stray, elderly cruller, he stretched himself out on his narrow bed, and lying there, contemplated a picture on the wall.

It was a photograph, cut from

NO TERRIBLE HEADACHE NOW

Found Quick, Sure Way to End Them

It's fortunate that a great Canadian doctor made the famous fruit, herb and tonic remedy, Fruit-A-Tives, Mr. C.D. Toronto, writes, "I was

bothered with very severe headaches. Pain on top of head and in forehead was more than I could bear. My doctor advised me to take Fruit-A-Tives. Since then I have not had any trouble with headaches." When you take Fruit-A-Tives, your liver is cleaned. Stomach, kidneys and intestines work naturally. Poison and wastes go. Food nourishes. Health comes. 25c and 50c. All druggists.

FRUIT-A-TIVES LIVER TABLETS

some English sporting magazine, and it showed a noble and stately castle, complete with donjon, towers, battlements, bow-men, mists, moat, portcullis and ivy. The caption revealed that this was Bingley Castle, near Pennyton, in Somersetshire, the seat of the Earls of Bingley since the sixteenth century.

For a long time Ernest gazed upon this historic structure, until he fell under the spell of a species of self-hypnosis, and the pedestrian modern world dropped away, and he saw a knight in shining armor, ride up on a prancing white war-horse to the massive gate of the castle. High up on one of the towers a lovely, fair-haired maiden, in wimple and sword, stood, waving a white kerchief at the knight.

"Be of good heart, Lady Rosa," the knight called out. "By my hall-dome, I'll rescue you."

"I have waited for you so long, Sir Ernest, so long," said the damsel.

The mundane jangle of his telephone caused this vision abruptly to vanish from before the enchanted eyes of Ernest Bingley.

"Hello," he said.

"Mr. Bingley?" asked a brisk, managerial voice.

"Speaking."

"This is the telephone company," said the voice. "We are testing your line. Would you mind standing six feet from the phone, and whistling."

"Not at all," said Ernest, and, backing away, he whistled a few notes.

"Could you hear me?" he asked.

"No," said the voice. "Will you please try again?"

"Certainly."

"Whistle a tune this time, and whistle louder, please," directed the voice.

Ernest whistled the first four bars of "Sally in Our Alley."

"How was that?" he asked.

"Very pretty, Sir Ernest," said the voice. "Now eat a package of your bird-seed."

He heard a volley of guffaws. It was the boys at the pool room having one of their little jokes.

Ernest put down the phone with a frown. Really, he mused, was always breaking his dreams.

He stretched himself on his bed again, and gazed at the castle, but he could not recapture the broken dream. He suddenly felt lonely, not with the loneliness of a mariner marooned on a desert isle, but with that even more acute loneliness of a stranger in a crowd.

Yet he was no exotic being, transplanted from foreign soil. He had always been, probably always would be a part of the town, but in the way that the appendix is part of the body, not well understood, or much wanted. He tried to understand why.

Was it his looks? He sprang up and confronted his visage in a mirror. He felt, in fairness to himself, that he did not look any funnier than most of his peers. If any one wanted to be hypercritical they might say that his nose was too long by a quarter of an inch, and had a tendency to point skyward, and a slight tuck might be taken in his ears, but, otherwise, no very drastic alterations were needed to make him rather handsome than the run of Bear Fallians.

They couldn't call him a sissy. In high school he had made the football team, and played right end with marked ferocity and some effect, considering his 140 pounds. Once he had run a mile at a track meet in 4:40 and won a silver cup that turned green with the spring.

Nor would any one call him mean, or a snob. His fellow citizens had imposed on his good nature too often to deny that he had an abundance of it. Yet he knew that they said of him that he was not a "regular fellow."

Abruptly he jumped up from his bed and out of his brooding.

"They can all go to blazes, the yahoos," he cried. "I'll be an irregular fellow if I want to be. I'm not like them and I'm glad of it. I'm a Bingley."

He rushed to his work-bench and began, furiously, to stuff a squirrel.

That he was a Bingley was Ern-

est's chief solace in times of stress, and at most other times, as well.

It was his one inheritance from his father, a singularly futile little man who had pottered through life in an optimistic, helpless daze, piddling away his patrimony, derived from a farmer father, on schemes for transmitting corn-silk into real silk, or inventing complicated gadgets for feeding pigs or waking sound sleepers, which were either phenomenally impractical or had already been invented by somebody else. In blacker moods Ernest sometimes felt that he was just another one of his father's unemancipated inventions. His mother he remembered only dimly, as something soft, warm and gentle.

Perhaps to compensate for his own lack of luster, Bingley, senior, had turned to genealogy.

From the American Institution of Genealogy and Numismatics, located in Goose Creek, Texas, the eldest Bingley had obtained, for ten dollars, a chart of the Bingley family tree, with all its roots, branches, limbs and twigs, and it now hung, with the Bingley coat-of-arms (another ten dollars) on the wall of Ernest's studio, though a net-work of school diplomas and another sheepskin document attesting that he had been granted the degree of M.T. (Master of Taxidermy), by the MacGrudger Correspondence University, Joplin, Missouri.

By sterring a somewhat cross-grained course through a net-work of nephews and uncles, Ernest arrived at the fact that he was indubitably descended from the founder of the American branch of the Bingley clan, one John Bingley, who settled near Danbury, Connecticut, in 1763, with his bride, Lucy, and seemed to become an embattled farmer and take pot-shots at red-coats as a corporal in General Washington's forces. He also produced a round dozen little Bingleys, and a grandson of one of them came as a home-seeker to Iowa and was responsible for Ernest's grandfather, and therefore for Ernest.

Peering into the even more remote past, a kinship could be discerned between the early John Bingley and the original and only genuine Bingleys of Bingley Castle, and they in turn could trace their ancestry all the centuries to a certain doughty Robert Bingley who was knighted by Richard the Lion Hearted for slaughtering an impressive number of infidels during a crusade. Robert, though the records are a bit fogged by years, lived, it is known, in the 16th century, and so it seemed, from a Norman of the 16th century, named Benjolie or perhaps de la Bindeley, and it was thus justified by Ernest that this Benjolie (or de la Bindeley) could follow a reasonably straight line back to Charlemagne, and he would trace his ancestry all the way to the Garden of Eden, the apes, the primordial ooze, or to whomever or whatever he might jolly well choose.

When rasped by the rough edges of life it was Ernest's habit to say "Robbie Oldie," count ten, and accept the situation with the grace and fortitude expected of one who bore a great name.

(To Be Continued)

High Grade Wheat Shortage

Spring Varieties Of High Protein Content Now Scarce

World shortage of high grade hard wheat, chiefly spring varieties of high protein content, is becoming increasingly apparent and being reflected in North American cash wheat markets.

Premiums on contract grades of Canadian wheat have soared in the Winnipeg Grain Exchange to an all-time high within the memory of the trade for this season of the year.

This wheat was planted by continental countries for blending in their mill grists to maintain their flour standards as native wheats this season do not contain the necessary milling and baking strengths.

Demand has resulted in small deliveries through the clearing house and only 4,228,000 bushels have been delivered against October contracts.

Quite Simple

"Doctor, I want you to look after my mother while I'm on vacation."

"But I've just graduated, doctor. I've had no experience."

"That's all right, my boy. My practice is strictly fashionable. Tell the men to play golf and ship the lady patients off to Europe."

To encourage wheat growing Costa Rica will supply the grain for sowing.

Electric railway signalling is being introduced into the Irish Free State.

Film actresses of Japan are being instructed in the handling of rifles.

No known cement will mend an amber pipe stem.

Not Dangerous To Users

Public Telephone Cannot Be Called A Disease Carrier

We confess to having a dislike to using public telephones in booths which may be used by a large number of people every day and never, apparently, disinfected. The short, funnel-shaped mouthpiece appears to be the perfect germ-trap, every person's mouth being within an inch or two of it. We, and perhaps many others, are glad to learn, therefore, that this is a misapprehension.

Over a period of eighteen months two bacteriologists of the Long Island College of Medicine experimented with public telephones in the city of New York. After the instruments had been in use some time the mouthpieces were removed and the bacteriologist counted. Deadly germs were found, of course, but not in such numbers that they were dangerous to telephone users. There are more germs in the booths than on the instruments. There are more germs in a picture theatre or, say at an election meeting, than on a telephone mouthpiece.

New York telephones to the number of 246 were studied in all parts of the city—none-too-clean barrooms, restaurants, railway stations and the modern office building occupied by the Radio Corporation of America. Some of these telephones were used 6,000 times a month; others rarely. But the bacteria on telephones used 6,000 times a month are no more numerous than on home telephones used only once or twice a day.

The public telephone, therefore, is not a disease carrier.—St. Thomas Times-Journal.

Radium Under The Sea

Sediment On Bed Of Ocean Contains Valuable Substance

Tremendous new reservoirs of radium, one of science's major weapons in combating cancer, have been found in sediment taken from ocean depths, Charles Snowden Piggot, of the Carnegie Institute, of Washington, revealed.

Piggot is an expert in taking "cores" from as deep as three miles below the surface. The cores, ranging up to 10 feet in length, portray the historical record of the ocean.

The discovery opens new avenues for research, he said, adding that the radium concentrations are greater in those portions of the ocean more remote from lands and lying at the greatest depths.

Hints New Discovery

Danger Of Blood Clot Following Operations May Be Removed

Research at the University of Toronto within the next year or two may remove the blood clot following operations, surgery's great danger, Canon H. J. Cody, University president, told a gathering in Toronto. Canon Cody who was made a Mason at eight highest honor within the craft, told the meeting in the Masonic Temple the report of the Board of Governors would make reference to the research in its present "incipient but gratifying state."

Lord Rothschild, who died recently, left 2,000,000 butterflies and moths, a gallery of stuffed animals and a private museum to preserve them to the Natural History Museum at Tring, England.

Little Helps For This Week

I said, I will take heed to my ways that I sin not with my tongue. Psalm 39:1.

No sinful word, nor deed of wrong. Nor thoughts that idly rove: But simple truth be on our tongue, And in our hearts be love.

Let us all resolve to attain the grace of silence, to deem all fault-finding that does no good a sin, and to resolve when we are happy ourselves not to poison the atmosphere for others by calling on them to remark every disagreeable feature of their daily life, and resolve to practise the grace and virtue of praise. If we are surrounded by those who constantly exhibit defects of character and conduct, and we yield to a complaining and impatient spirit, we shall mar our own peace without having the satisfaction of benefiting others.

THIS BACKACHE IS AGONY!

KIDNEYS WILL CAUSE IT!

Sluggish kidneys let poison accumulate in your system. Lame back, lumbago and rheumatism often follow. Gin Pills will give the kidneys the help they need to filter out the poisons that cause the pain.

"Prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

Cunard-White Star To Carry The Name Of Mauretania

The proud old name of Mauretania will return to the North Atlantic passenger trade.

The Cunard-White Star Steamship Line announced its new 30,000-ton liner—a comparatively small craft as trans-Atlantic liners are reckoned nowadays—would be named after the famed Cunarder ordered broken up in 1955.

The new Mauretania will be launched July 28, 1938. She is expected to be in service by 1939.

The old Mauretania established her best record for the North Atlantic crossing in August, 1929, when she reached Plymouth forty days, 17 hours, 49 minutes out of New York. She made her last voyage from Southampton in July, 1935.

The Indian Ocean has an area of 17,084,000 square miles, being the third largest body of water in the world. Its maximum depth is 11,136 feet.

An army officer has listed the greatest generals in history. If "greatest" means the ones who influenced the world most, don't overlook General Apathy.

Conversation is an art, but talking is a habit.

Do a favor to your friends and they will never forgive you for it.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson, every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates: The advance are: display, 40¢ per inch for first week and 30¢ for each succeeding week, providing no change is made. For heavy competition an extra charge is made for first week. Reading notices, 10¢ per cent line. Legal advertising, 15¢ per cent line for first week and 10¢ for each succeeding week. Cards or blanks, \$1.00.

Advertisements under this heading are charged at the rate of 50¢ for 2 words or less per week, with two for each additional 5 words. Three weeks for the price of two.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

Ladies' Card Club

The Ladies' Card Club met Tuesday evening at the home of Mrs. Morrell. Ti-

honors were shared by Mrs. W. S. Lee and Mrs. J. Peyton.

"Hello Canada" -- and hockey fans in Newfoundland and the United States! Once more, on Saturday November 6th, Foster Hewitt's familiar greeting will sweep over a chain of stations from Coast to Coast. Fans in Canada -- the United States -- and in even more distant countries -- will rally round their radios to hear the opening Imperial Oil Hockey Broadcast of the game between Toronto Maple Leafs and New York Americans, at Maple Leaf Gardens.

That this program is the world's biggest and most popular weekly sports broadcast, is borne out by a letter received from an enthusiastic woman hockey fan, formerly of Nova Scotia, but who writes to say she is going to "listen in" from her far-away new home in Cristobal, Canal Zone, where, she claims, reception is crystal clear.

The Imperial Oil Hockey Broadcasts will expand this coming winter, practically "blanketing" every province in Canada with the broadcast of games played either in Toronto or in Montreal.

Last winter, broadcasting of Montreal games was not permitted during the regular season schedule, leaving province of Quebec listeners without hockey until the play-off his winter, however, Imperial Oil Limited has secured a franchise for all Saturday night games in Montreal.

With the province of Quebec thus provided for, the hockey network will now cover the entire Dominion with games played either in Toronto or in Montreal.

Imperial Oil's Montreal staff of English announcers is already familiar to listeners throughout Canada, due to its handling of its play-off games last winter. But, in addition to the English broadcasts of games at the forum, there will be a companion broadcast entirely in French, and featuring Roland Beaudry as the play announcer. This will be out over a Quebec provincial network of five stations believed to be the largest French language network ever used in a weekly sports feature.

Thus, the Imperial Oil Hockey Broadcasts during the coming winter will actually consist of three separate and distinct broadcasts every Saturday night. One of these

will be the regular broadcast of the Maple Leaf home game on the Maple Leaf Gardens in Toronto. A second will be the English broadcast of either the Maroons or Canadians home games at the forum in Montreal -- which may occasionally be heard over the national network, particularly during the play-offs, the third will be the all French broadcast of the Montreal game, sent out over a Quebec provincial network.

It is believed that this dual broadcast from Montreal is the only weekly two-language feature of its sort in the entire world.

From: McLaren Advertising Co., Ltd., Editorial Service,

Mr. and Mrs. W. D. Stacey of Edmonton, were calling on old acquaintances in Chinook on Monday. Mr. Stacey is Buildings Inspector for the government.

Mr. Jake Berry, of Kentucky arrived here on Monday to visit with his parents, Mr. and Mrs. H. F. Berry.

Mr. S. M. Brown of the Coltholme district left Friday enroute for Vancouver where he will spend the summer months. He visited with his niece, Mrs. W. Wilson before leaving and will also stop off at Turner Valley to visit with relatives.

Mr. Shier, of Cayley, is visiting this week with his sister, Miss Shier, primary teacher.

Mrs. J. Coutts moved to town for the winter months.

Don't forget the Women's Institute are having a Silver Tea and Bazaar on Saturday Nov. 6th. at Cooley's Garage. The sale of Fancy Work etc. will start at 2.30 sharp.

Mrs. E. C. Pfeiffer is a Calgary visitor this week.

Mr. W. Milligan is a Chinook visitor this week.

Earl Robinson made a trip to the Sherness Coal mines on Wednesday.

Gordon and George Anderson returned Tuesday from Rowley where they have been assisting with the harvest work.

Mrs. Clifford Petersen and small daughter, returned from Drumheller.

First train Ride In three Decades COMREY, Oct 29 (Specials)

It has been 27 years since she last boarded a train. That was when she moved to Comrey from Washington.

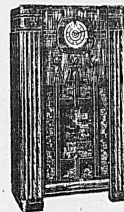

COMREY, Oct. 29 (Special) — In a community where young and old are designated by their Christian names, it is very confusing if those names are duplicated. The situation is quite humorous at times at Comrey, where four "Oscar's" reside all within a mile of the post office. The four are Oscar Olson, Oscar Bjorklund, Oscar Unger and Oscar Nelson.

The latter lived in Chinook for a number of years.

CALGARY EDMONTON LETHBRIDGE

\$100,000,000 Dominion of Canada 1937 Refunding Loan

The Bank of Canada is authorized by the Minister of Finance to receive Subscriptions for this Loan, to be issued as follows:

One and One-Half Year 1% Bonds, due June 1, 1939

Issue price: 99.125% and accrued interest,
Yielding approximately 1.59% to maturity

AND

Seven Year 2½% Bonds, due November 15, 1944

Issue price: 98.50% and accrued interest,
Yielding approximately 2.74% to maturity

AND

Fourteen Year 3¼% Bonds, due November 15, 1951

Callable on or after November 15, 1948

Issue price: 99.00% and accrued interest,
Yielding approximately 3.34% to maturity

The 1% Bonds will be dated December 1, 1937. The 2½% Bonds and the 3¼% Bonds will be dated November 15, 1937. Principal and interest will be payable in lawful money of Canada. Interest will be payable without charge, semi-annually, at any branch in Canada of any Chartered Bank.

1% Bonds \$1,000
Denominations: 2½% Bonds \$1,000
3¼% Bonds, \$100, \$500 and \$1,000

Proceeds of this loan will be used for refunding, in part, the outstanding total of \$122,799,800 on converted Dominion of Canada 5½% Victory Loan Bonds maturing December 1, 1937. The additional cash required for this purpose will be provided from the Treasury.

Payment is to be made in full against delivery of interim certificates on or about November 15, 1937, in the case of the 2½% Bonds and the 3¼% Bonds, and on or about December 1, 1937, in the case of the 1% Bonds.

5½% VICTORY LOAN BONDS DUE DECEMBER 1, 1937 (WITH FINAL COUPON DETACHED) will be accepted at par up to the amount required for payment of allotments of the new bonds. Resultant cash adjustments, where necessary, will be made at the time of delivery.

Subscriptions may be made to the Head Office of the Bank of Canada, through any branch in Canada of any Chartered Bank or through any recognized dealer, from whom copies of the Official Prospectus containing complete details of the loan may be obtained. The Minister of Finance reserves the right to allot subscriptions in full or in part.

The subscription lists will open November 3, 1937, and will close as to any or all of the maturities, with or without notice, at the discretion of the Minister of Finance.

OTTAWA, NOVEMBER 2, 1937.
